DeepLearning.AI Community Guide

Welcome!

If you are new to Discourse, here is a how-to guide to help you get started and get the most out of this Discourse forum.

Before diving into the details, please note that from now on we'll only be using Discourse for learner support. For any questions or feedback about our courses, please post them in Discourse instead of the Coursera Forum. To create your account, click on the tool in the item in your course, it will take you to a different page to create your account.

To allow quick and easy access to our DLAI Discourse instance, we recommend you bookmark this page in your browser: <https://community.deeplearning.ai/>

Table of Contents

You can click the link below to jump to a section. Or simply scroll down and read through each of the sections.

Community Training Document

1. Overview of Discourse

Discourse framework/structure is :

Discourse > Categories> Sub-categories > Topics > Replies

1) **Categories:**

Specializations are organized as categories in Discourse. These can be accessed by all learners. Some of the specializations you will notice on discourse are -

- [Deep Learning Specialization](#)
- [Machine Learning Engineering for Production \(MLOps\)](#)
- [Practical Data Science](#)
- [Natural Language Processing](#)
- [Generative Adversarial Networks \(GANs\)](#)
- [AI for Everyone](#)
- [AI for Medicine](#)
- [TensorFlow Developer Specialization](#)
- [TensorFlow Data and Deployment Specialization](#)
- [TensorFlow Advanced Techniques Specialization](#)
- [The Machine Learning Specialization](#)

You may also see below specified categories, but request you to refrain from posting specialization or course related topics in these categories. Otherwise, there is a high chance that your posts may go unnoticed or unanswered for quite some time.

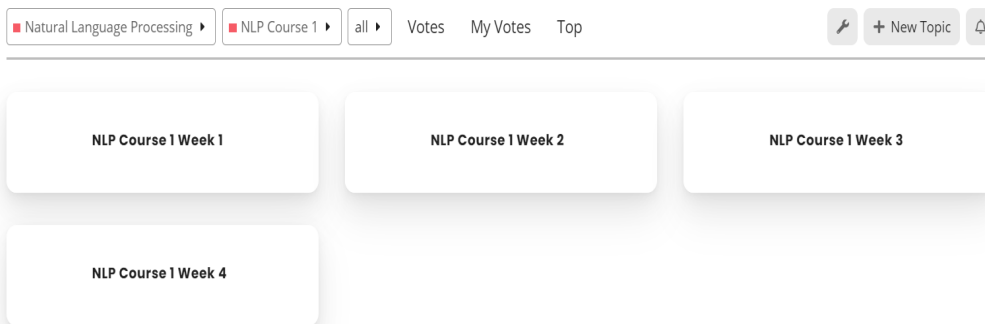

- [General Feedback About Discourse Platform](#)
- [Awards and Recognitions](#)
- [Careers/Job Opportunities](#)

2) **Sub-categories:**

Within any category related to a specialization, below sub-categories will be present-

- **Course [1, 2, 3...] / Week [1, 2, 3...]**
 - All communications, suggestions and feedback discussions pertaining to course content (such as videos, notebooks, labs, assignments, quizzes, reading items, graders, links/access issues etc.) need to be posted inside course sub-categories. For most specializations, there will be another level of sub-categorization by week.

Community Training Document

- Note that the number of courses and number of weeks within the course will vary by specialization.
- **Introductions**
 - This sub-category is meant for building network, rapport & interactions
- **Announcements**
 - This is where updates & news related to the specialization will be announced
- **Mentor Lounge**
 - This is a private sub-category which is accessible only by mentors & staff.
- **Alpha Testing**
 - This is a private sub-category which is accessible only to alpha testers of the courses/specialization and staff.
- **Beta Testing**
 - This is a private sub-category which is accessible only to alpha+beta testers of the courses and staff.

For example, within [Deep Learning Specialization Refresh](#), below sub-categories will be listed:

- [DLS Course 1](#)
- [DLS Course 2](#)
- [DLS Course 3](#)
- [DLS Course 4](#)
- [DLS Course 5](#)
- [DLS Introductions](#)
- [DLS Announcements](#)
- [DLS Resources](#)
- [DLS Mentor Lounge](#)

3) Topics:

Within subcategories are topics. Topics are a collection of messages grouped under one umbrella. You can post questions, course feedback or initiate discussions by creating a new topic, or replying to existing topics. This is primarily how mentors will interact, support and answer learner's queries.

Community Training Document

At the end of the original post you will see a list of related topics that link to the one you are reading.

4) Replies:

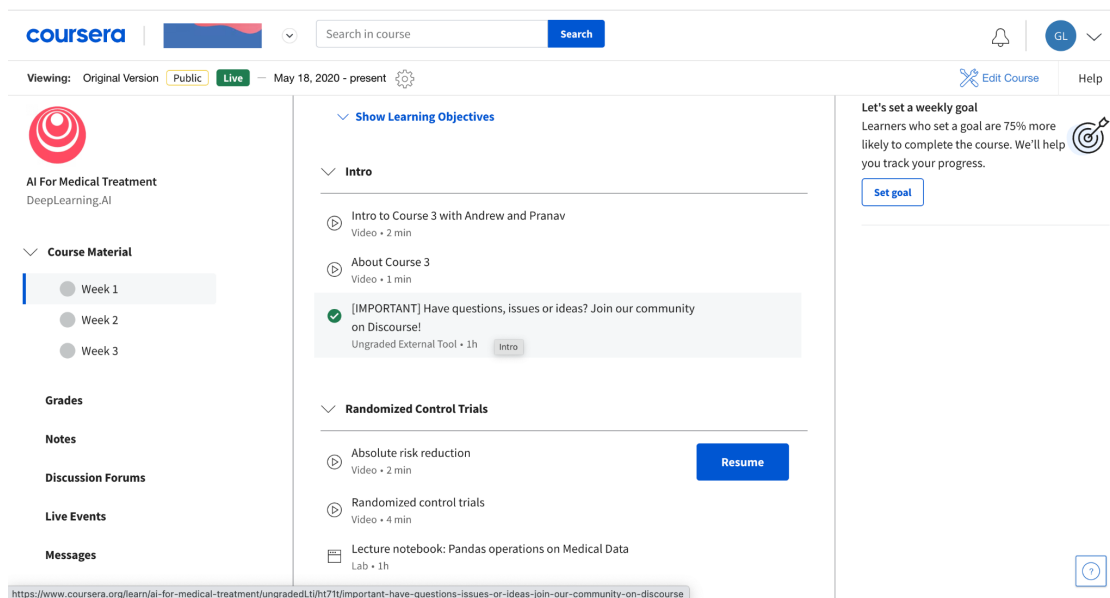

Press any  Reply button to open the editor panel at the bottom of your browser.

To reply to a specific post in a topic, click the gray Reply button at the end of each post and your reply is linked to that post.

2. Account Setup Instructions

- To create your account, click on the tool in the item in your course.

Community Training Document

The screenshot shows the Coursera interface for a course titled 'AI For Medical Treatment'. The top navigation bar includes the Coursera logo, a search bar, and user options. The course is currently in 'Live' status. The main content area shows the course structure with sections like 'Intro', 'Randomized Control Trials', 'Average Treatment Effect', 'Individualized Treatment Effect', 'Quiz: Measuring Treatment Effects', and 'Assignment: Treatment Effect Estimation'. A sidebar on the left contains a list of videos and a section titled 'Ungraded External Tool: [IMPORTANT] Have questions, issues or ideas? Join our community on Discourse!'. The main content area also includes a message about the Discourse site, a 'Coursera Honor Code' checkbox, and a 'Launch tool as:' dropdown menu with 'Learner' selected. An 'Open Tool' button is at the bottom.

- By accepting, it will take you to a different page to create your account.

The screenshot shows the DeepLearning.AI Discourse sign-up page. The header includes the DeepLearning.AI logo and navigation links for 'Programs', 'The Batch', 'Events', 'Company', and 'Log in'. The main content area is titled 'You were invited by:' and shows the user 'deeplearning Admin'. Below this are input fields for 'Email', 'Username', 'Name', and 'Password', each with a red asterisk indicating a required field. There are also checkboxes for 'Never shown to the public', 'unique, no spaces, short', 'Your full name', and 'at least 10 characters'. A text area for 'What brings you to the community?' is followed by a checkbox for 'To receive email updates from DeepLearning.AI'. The checkbox is checked, and the text below it reads: 'By signing up for Discourse, I agree to receive future AI news and company updates from DeepLearning.AI. I understand that I can manage my subscription at any time.' At the bottom is an 'Accept Invitation' button.

Community Training Document

- Complete your profile: when signing into Discourse for the first time, go to your profile and add a bit of introduction of yourself.
- Introduce yourself in the “Introductions” sub-category of the specialization you are interested in learning or building your network.
- Get to know your peers and/or mentors
- Discourse is about connecting, contributing and supporting. So, when you are ready, post your queries/suggestions/feedback as new topics and/or share your thoughts by replying to existing topic threads, click the like button for an existing topic, and do much more to build the community.

3. Guidelines

- Do not create duplicate threads to discuss topics that already exist.
- Ensure you select the appropriate category and subcategory.
- It is recommended to follow the below naming convention to give a title to your post. Use N/A if any of the parts of the naming convention are not applicable to your title.

[Course Number]_[Week number]_[Item]_[Issue Description in short]

Example 1: C4_W3_Exercise3_Grading error

Example 2: C1_W2_Reading Item_link not working

Example 3: C2_W1_Notebook_Lost previous work

Example 4: C3_N/A_N/A_Unable to access course

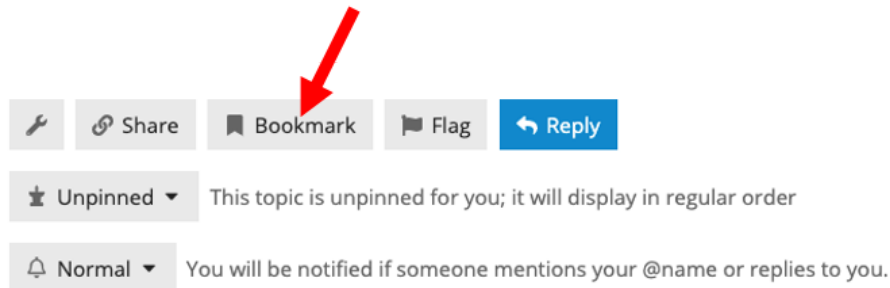

- Avoid typing words in capital letters except when referring to well-known acronyms (ex: GANs).
- On publicly visible threads, **do not share solutions**/answers to quizzes, notebooks, or graded lab related code.
- Be kind to other members of the community.
- Report inappropriate behavior to mentors or DeepLearning.AI staff. More information regarding this can be found in [Coursera's code of conduct](#)

Community Training Document

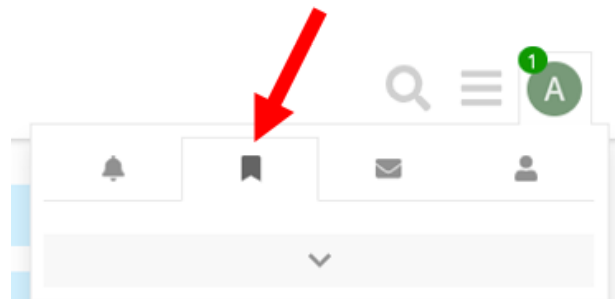

4. Tips

- On clicking the  DeepLearning.AI logo at the top left corner of the screen, you will be navigated to the homepage of Discourse, no matter where you were previously.
- **Bookmark:** bookmark a topic that you found helpful so you can easily find them.

You can review your list of bookmarks by clicking your profile image on the top right and choosing bookmarks.

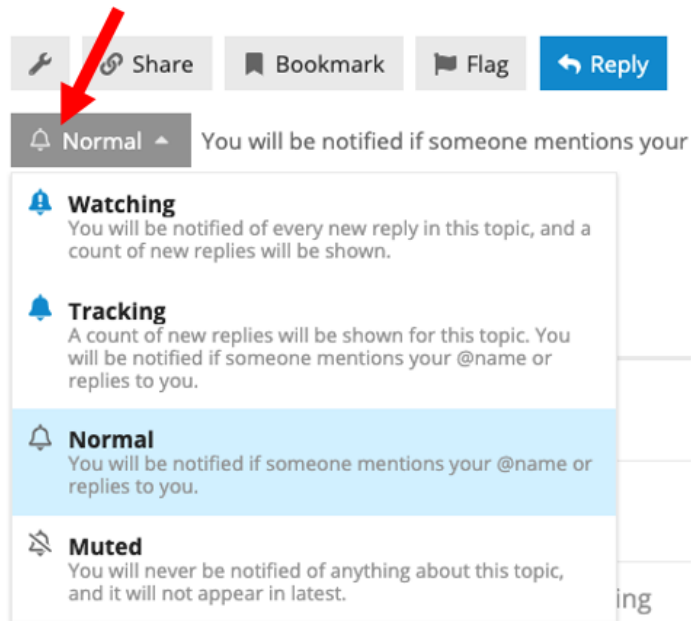

- **Subscribing to categories and topics:**

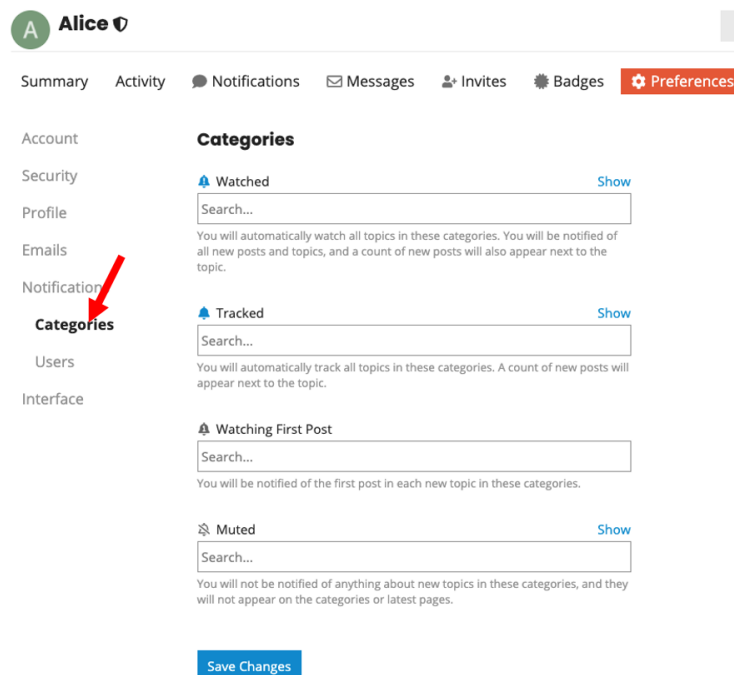

To subscribe to a Topic (or thread) go to the topic, scroll to the bottom and click on the notifications dropdown.

Community Training Document

To subscribe to a Category, go to your preferences (via your Profile page) and click on Categories.

- **Markdown:** Posts in Discourse are formatted using Markdown. When you create a post, you will see the raw markdown on the left and a preview on the right. Check out the [Markdown Cheatsheet](#) if you are not well versed with it and want a handy guide.

Community Training Document

This helps in improving visibility of more upvoted topics and helps in putting more upvoted posts on top while someone searches for similar issues. You'll see the vote button next to the topic.

Remember that you have a limited number of votes to give on the platform (and only 1 vote per topic) so use this feature judiciously.

☒ C2W1 Assignment - grader output showed error
■ MLEP Course 2 1 vote

5. User Trust Levels

Discourse relies on “Trust Levels.” They represent a natural progression for participants in the community, and as you interact more, you achieve higher levels of trust by the system. Below are the default starting levels for new users (i.e. learners) and mentors.

All new users start with Trust Level 1. They are able to:

- Use all core Discourse functions; all new user restrictions are removed
- Send PMs
- Upload images and attachments if enabled
- Edit wiki posts / regular posts
- Flag posts
- Mute other users

Mentors have Trust Level 3. Users with this Trust Level are able to:

- Recategorize and rename topics
- Access a secure category only visible to users at trust level 3 and higher
- Have all their links followed (we remove automatic nofollow)
- TL3 spam flags cast on TL0 user posts immediately hide the post
- TL3 flags cast on TL0 user posts in sufficient diversity will auto-silence the user and hide all their posts
- Make their own posts wiki (that is, editable by any TL1+ users)
- Daily like limit increased by 2×

To learn more, here are some resources you can check out:

- [Discourse Cheat sheet](#)

We are here to support you along the way. If you have any questions, thoughts or ideas, we'd love to hear it! You can either open a topic in the [General Site Feedback](#) or email us at community@deeplearning.ai.

Thank you!
